DISCLAIMER: Choosing your natural stone products from Universal Hardscape Supplies ensures that you have purchased a quality travertine or limestone, for a beautiful solution for your outdoor living space projects. Sedimentary rocks such as travertine and limestone often have mineral deposits and other inclusions that give every piece its unique patterns and colors. Variations in color, pattern, texture and/or veining are considered a normal part of any natural product and an order is considered accepted upon receipt. The actual stone delivered may differ from the sample or picture(s) shown and from future orders. Pricing may also vary for future purchases as the market can also fluctuate. Cracks, stains, breakage, or fissures that may occur after you have accepted and installed the tiles while in good condition are considered the responsibility of the purchaser. Universal Hardscape does not warranty any stone pavers surrounding saltwater pools. Returns, refunds or exchanges will not be accepted once the order has been received.
